Evergreens are becoming more p	
each year. They are beginning to	
out the old plantings of shrubbery	
have monopolized the home groun	ds for
so long.	

rees anted

The first cost of evergreens is low compared to their increasing value year after year, and the value they add to the home property.

Properly grown, carefully dug and handled, they are as easy to transplant and make grow as any other plant.

Full directions for planting and care of evergreens will be given at time of purchase.

Hardy Shrubs and Roses not listed here. If interested ask for list.

POTTED FLOWER PLANTS

Geraniums, Daisies, Cannas, Petunias, Fuchsias, Begonias, Lobelia and other plants suitable for window boxes or bedding out.

rees anted

When planting in a rock garden, use some of the tall growing varieties for background, such as the American and Pyramid Arbor Vitae, Austrian and Scotch Pine, Norway Spruce and Canadian Hemlock.

The Junipers and Arbor Vitaes can be trimmed to prevent spreading or growing too tall.

PERENNIALS IN BLOOM

Don't forget to visit the nursery during the month of June when thousands of perennials are in bloom, and in July and August when many varieties of Hardy **Phlox** are in bloom. A good display will be on hand each day from which to select.

ANNUALS IN BLOOM

Many annuals are in bloom at the nursery during the summer months. If your garden is not complete, you can get **Petunias, Verbenas, Bachelor's But**tons, Pinks, Marigolds, Lobelias, Snapdragons, Zinnias, etc., all in bloom, just what you need to fill up that vacant space in the garden.

The nursery is open every day all summer. The summer planting of flowers is increasing each year. The plants should be planted in late afternoon or evening for best results. Water the ground before planting and again afterwards. Press earth firmly around roots.

Perennials should be protected in winter with a covering of three or four inches of straw. Cover in the fall when the ground starts to freeze.

When planting a shade tree cut back top branches one-half. Dig the hole deep and fill with water which should be allowed to settle. Set tree deep and tamp hard with foot. After tree is planted water again. Then water about twice a week for a month if in sandy soil. Less watering is required in heavy soil. Some varieties of trees will drown if watered too much.

BLACK DIRT

Our black dirt is nearly all humus. Humus is decayed vegetation and decayed vegetation is nature's fertilizer. It produces a good growth of new vegetation wherever used, in flower pots, window boxes, flower beds, gardens or lawns.

Vigoro is a highly concentrated fertilizer. It acts quickly and should be used in starting small plants. Spread on a coating of about 1 lb. to 3 or 4 square yards, and mix in the soil to a depth of 3 or 4 inches before setting in plants. Use it in connection with our Humus soil to start a more rapid growth.

ROCK GARDENING AS A PASTIME

If you must have a hobby, try your hand at rock gardening. There is always something in nature that appeals to everyone. A rock garden built to represent nature is most fascinating. There is something in a well-built rock garden to interest everyone, the plants and flowers, the rocks, the water, water plants and fish, or the effect of the entire arrangement of the pool and the garden. Hills and valleys, streams and waterfalls representing in miniature what we have seen in nature make a grand display.

One might travel for days, and not find a spot so interesting as a carefully built rock garden on his own home grounds.
